1. General

1.1. Definition

The Database Editor is a GUI application that allows the user to edit and manage the Communication System content data and compile the content updates to be loaded on the cars. This document provides the user instructions of the Database Editor.

1.2. Requirements

1.2.1. System Requirements

Item	Requirements
CPU	Core Duo (1.66 GHz) or better
Graphics	1280 * 1024 or more
RAM	1024MB or more
HDD	80GB or more
Operating System	Windows XP, Windows 7

2. User Instruction

2.1. Train Information

Below screen is displayed when the program is executed.

Figure 1 Train Information Screen

2) Train Headers Information
3) Train Routes Information
4) Destination Indicator

2.1.1. Menu Icons

Table 1 Menu Icons (Train Information)

Icon	Name	Description
	Import CSV	Import CSV
	Add Header	Add operation information
	Copy Header	Copy operation information
	Speaker Settings	Exterior speaker level settings
	Settings	User settings
	Update	Create update data

2.1.2. Train Headers Information

This section shows the train schedules and related characteristics.

Figure 2 Train Headers Information

Train Headers Information

	Train Num	Type	DaysOp	Origin	Code	Destination	Code	Start Time	End Time
1	10	Local	WEEKDAY	Denver Airport Station	UCA	Union Station	UCA	00:00	00:00
2	11	Local	WEEKDAY	Union Station	UCA	Denver Airport Station	UCA	00:00	00:00
3	50	Local	WEEKDAY	Wheat Ridge / Ward Station	GLD	Union Station	GLD	00:00	00:00
4	51	Local	WEEKDAY	Union Station	GLD	Wheat Ridge / Ward Station	GLD	00:00	00:00
5	80	Local	WEEKDAY	South Westminster Station	NWE	Union Station	NWE	00:00	00:00
6	81	Local	WEEKDAY	Union Station	NWE	South Westminster Station	NWE	00:00	00:00
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)

1) Train Number
2) Service type
3) DaysOP
   - WEEKDAY: Operate Monday through Friday.
   - FRIDAY: Operate Friday only.
   - SATURDAY: Operate Saturday only.
   - SUNDAY: Operate Sunday only.
4) Origin
5) Origin Code
6) Destination
7) Destination Code
8) Start Time
9) End Time

2.1.3. Train Route Information

This section shows the station stop listings of the selected train number.

Figure 3 Train Routes Information

Train Routes Information

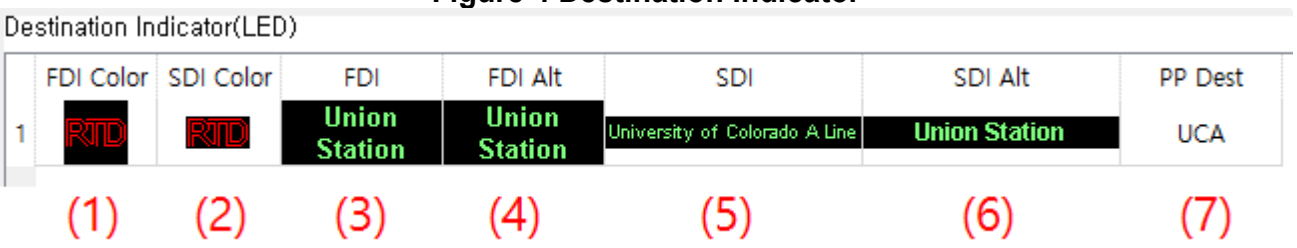
	StationCode	ArrivalTime	DepartureTime	Bypass	StationInfo	TP1Spk
1	Denver Airport Station	00:00	00:00			0
2	61st and Pena Station	00:00	00:00			0
3	40th and Airport - Gateway Park Station	00:00	00:00			0
4	Peoria Station	00:00	00:00			0
5	Central Park Station	00:00	00:00			0
6	40th and Colorado Station	00:00	00:00			0
7	38th and Blake Station	00:00	00:00			0
8	Union Station	00:00	00:00			0
	(1)	(2)	(3)	(4)	(5)	(6)

1) Station name
2) Arrival time
3) Departure time
4) ByPass: [SKIP] if the station is scheduled to be skipped.
5) Station Info: Other characteristics of the station (CONNECT, DISCHARGE, FLAG STOP)
6) TP1Spk~TP9Spk: Speaker settings for each individual trigger points related to the station

2.1.4. Destination Indicator

This section shows the LED destination indicator images related to the selected train number.

Figure 4 Destination Indicator



1) FDI color block image
2) SDI color block image
3) Primary FDI destination message
4) Secondary FDI destination message
5) Primary SDI destination message
6) Secondary SDI destination message
7) Destination code to determine PID message header

2.1.5. Editing Train Headers Information

In the Train Headers Information table, double click an item to make change.

Figure 5 Editing Train Headers Information

Train Headers Information

	Train Num	Type	DaysOp	Origin	Code	Destination	Code	Start Time	End Time
1	10	Local	WEEKDAY	Denver Airport Station	UCA	Union Station	UCA	00:00	00:00
2	11	Local	WEEKDAY	38th and Blake Station 40th and Air...Park Station 40th and Colorado Station 41st / Fox Street Station 60th & Sheri...rike Station 61st and Pena Station Arvada Ridge Station Central Park Station Clear Creek ...eral Station Denver Airport Station	UCA	Denver Airport Station	UCA	00:00	00:00
3	50	Local	WEEKDAY		GLD	Union Station	GLD	00:00	00:00
4	51	Local	WEEKDAY		GLD	Wheat Ridge / Ward Station	GLD	00:00	00:00
5	80	Local	WEEKDAY		NWE	Union Station	NWE	00:00	00:00
6	81	Local	WEEKDAY		NWE	South Westminster Station	NWE	00:00	00:00
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)

1) Train Num: Input train number
2) Type: Not used for RTD system. Use 'Local' only
3) DaysOp: Select from WEEKDAY/SATURDAY/SUNDAY/FRIDAY
4) Origin: Departure station
5) Origin Code: Route code before Center City
6) Destination: Destination station
7) Destination Code: Route code after Center City
8) Start Time: Input starting time of train operation
9) End Time: Input ending time of the train operation

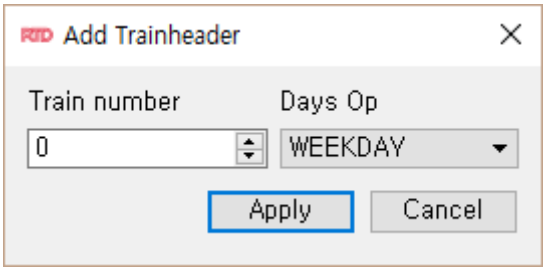
2.1.6. Adding Train Headers

To add new train headers, do one of the following:

- Click icon
- Click Edit – Add Train Headers Information in the pull-down menu
- Press [F9] (new train number created at the bottom of the table)
- Press [Insert] (new train number created at the selected location)

Below dialogue will pop up:

Figure 6 Adding New Train Headers Information



Enter the desired train number in the Train Number field.

Select the desired operating days in the DaysOp field

Click Apply to create the new train number. Click Cancel to cancel.

*** Duplicate Train Number will not be applied to the database.

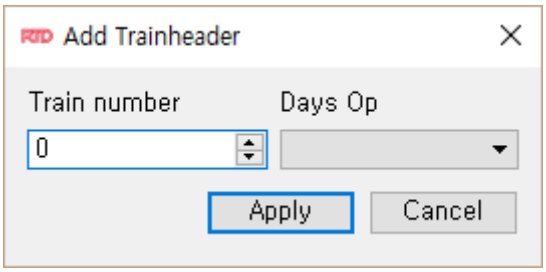
2.1.7. Copying Train Headers

To make a copy of an existing train number, select a train number to copy and do one of the following:

- Click icon
- Click Edit – Copy Train Headers Information in the pull-down menu

Below dialogue will pop up:

Figure 7 Copy Header



Enter the desired train number in the Train Number field.

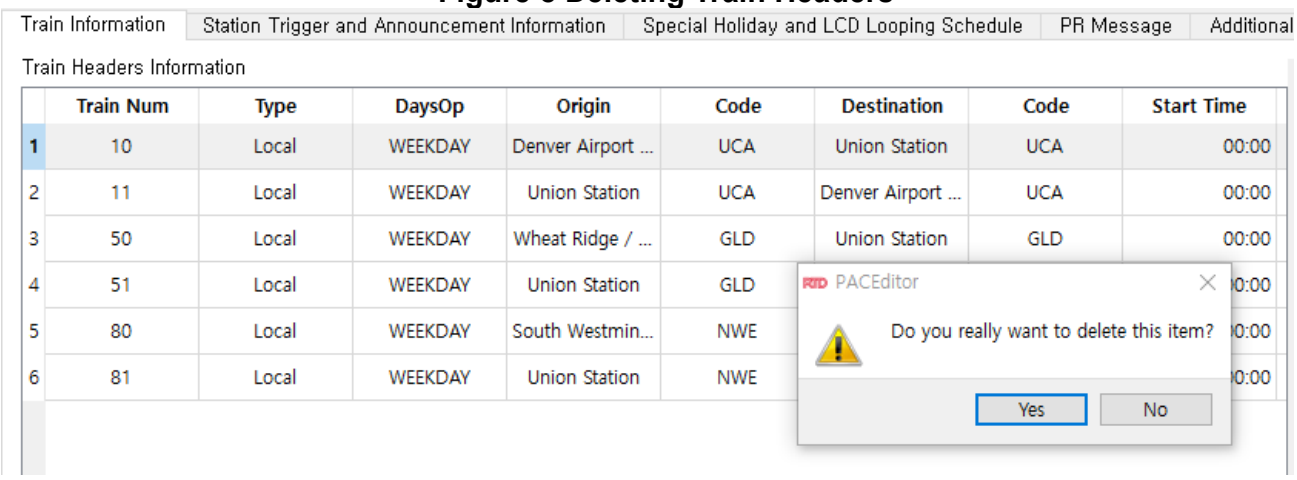
Select the desired operating days in the DaysOp field

Click Apply to create the new train number. Click Cancel to cancel.

2.1.8. Deleting Train Headers

Select a train number to delete, and press [DEL] key on the keyboard.

Figure 8 Deleting Train Headers

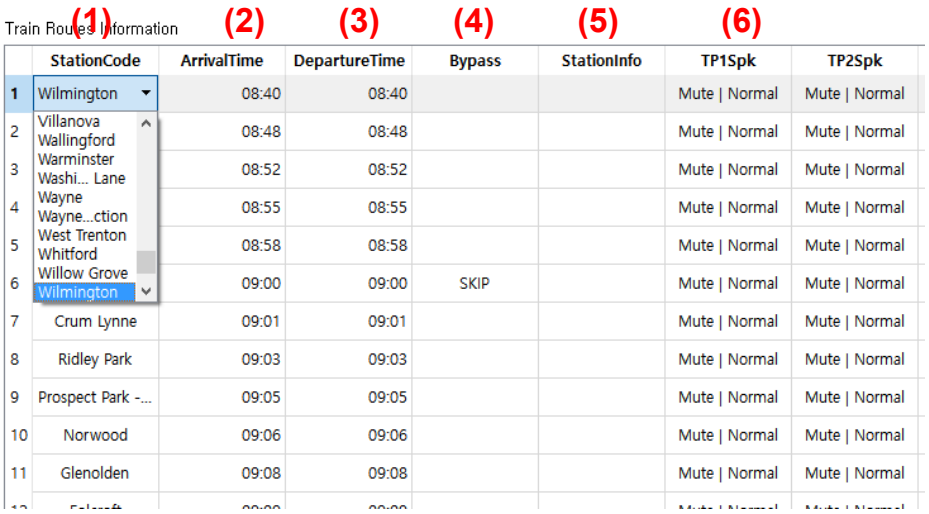


Click "Yes" to delete the train headers and all related data.

2.1.9. Editing Train Routes Information

In the Train Routes Information table, double click an item to make change.

Figure 9 Editing Train Routes Information



1) StationCode: Select station name
2) ArrivalTime: Enter arrival schedule for the station
3) DepartureTime: Enter departure schedule for the station
4) Bypass: Select [SKIP] to schedule the station to be skipped as default
5) StationInfo: Select other properties as CONNECT, DISCHARGES, FLAGSTOP
6) TP1Spk~TP9Spk: Select speaker settings for each individual trigger points

2.1.10. Adding Station to Route

To add a station to a train number, do one of the following:

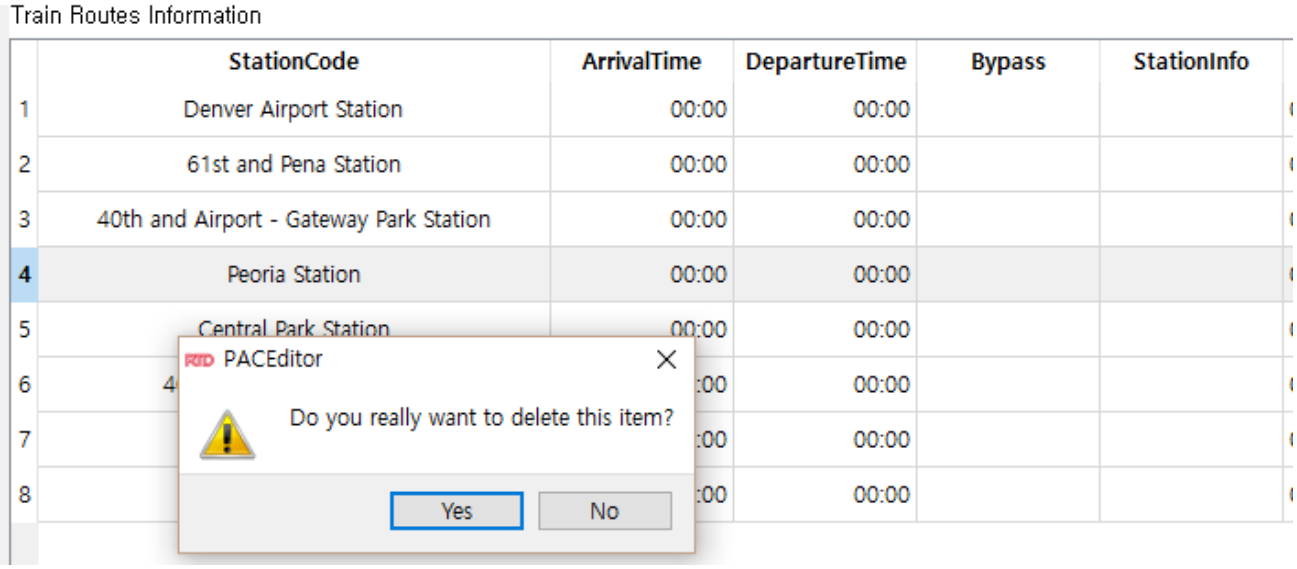
- Select a station and press [Insert] (new field created at the selected location)
- Press [F9] (new field created at the bottom of the table)

Select/enter data into each data fields as appropriate.

2.1.11. Deleting Station from Route

To delete a station from a route, click the station to delete and press [Delete].

Figure 10 Deleting Station from Route

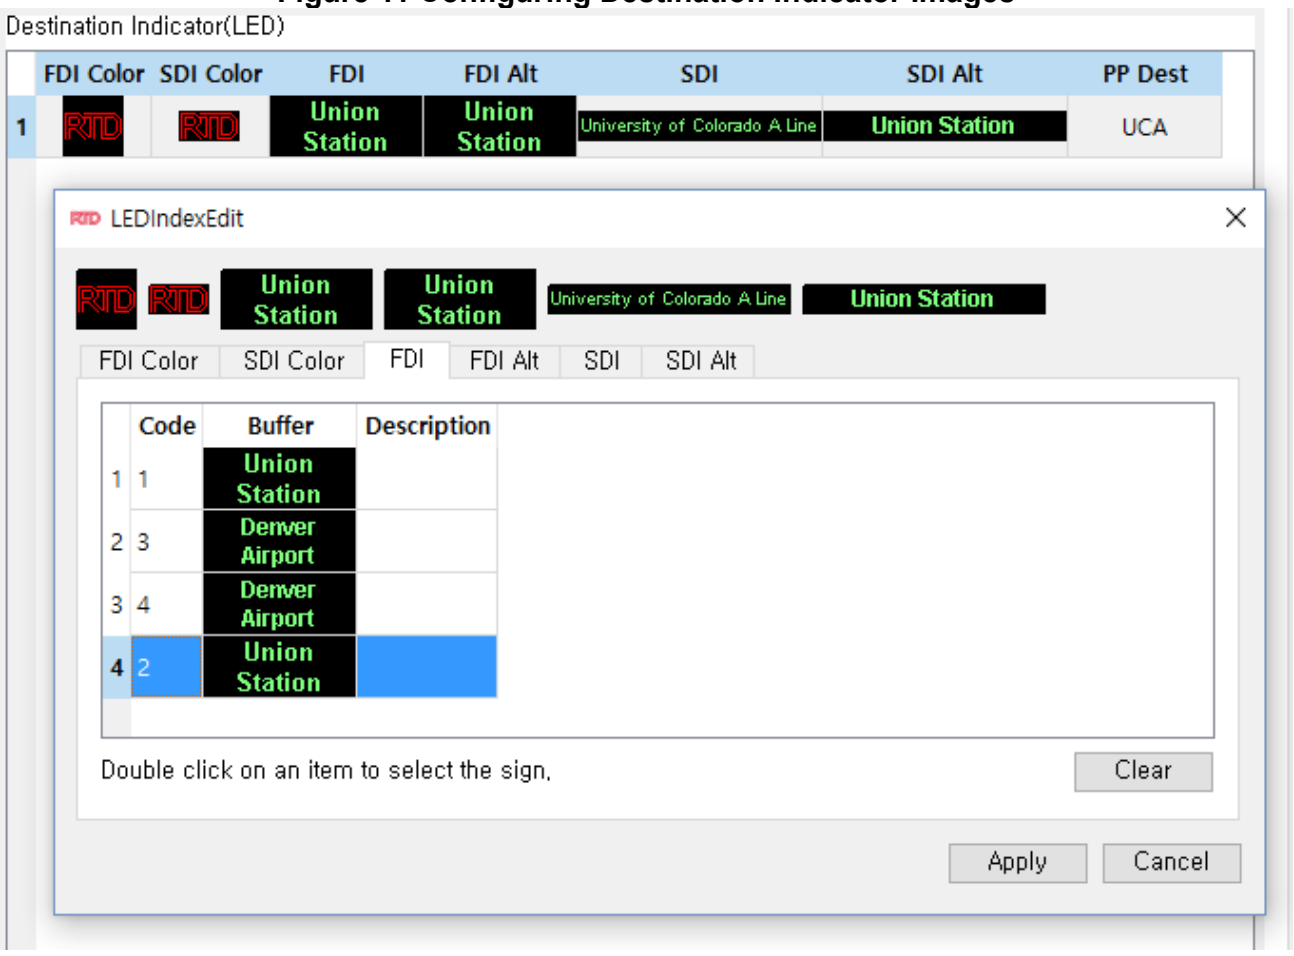


Click Yes to delete, No to cancel.

2.1.12. Configuring Destination Indicator Images

To configure destination indicator images, double click the item to make change.

Figure 11 Configuring Destination Indicator Images



- The top row of the dialogue shows the currently selected images
- Use FDI Color ~ SDI Alt tabs to select the image type where you wish to configure an image
- Double click an image from the table to make selection
- Click Apply to complete. Click Cancel to dismiss

2.1.13. Exterior Speaker Settings

Click

icon to open the Exterior Speaker Settings Dialogue

Figure 12 Exterior Speaker Settings

	From	To	Settings
1	00:00	01:00	Normal
2	01:00	02:00	Normal
3	02:00	03:00	Normal
4	03:00	04:00	Normal
5	04:00	05:00	Normal
6	05:00	06:00	Normal
7	06:00	07:00	Normal
8	07:00	08:00	Normal
9	08:00	09:00	Normal
10	09:00	10:00	Normal
11	10:00	11:00	Normal
12	11:00	12:00	Normal
13	12:00	13:00	Normal
14	13:00	14:00	Normal
15	14:00	15:00	Normal
16	15:00	16:00	Normal
17	16:00	17:00	Normal
18	17:00	18:00	Normal
19	18:00	19:00	Normal

	TP	Settings
1	TP1	Mute
2	TP2	Mute
3	TP3	Mute
4	TP4	Mute
5	TP5	Normal
6	TP6	Mute
7	TP7	Mute
8	TP8	Mute
9	TP9	Mute

	Station Name	Speaker Settings
1	30th Street Station	Normal
2	49th Street	Normal
3	Airport Terminal A	Normal
4	Airport Terminal B	Normal
5	Airport Terminal C D	Normal
6	Airport Terminal E F	Normal
7	Allegheny	Normal
8	Allen Lane	Normal
9	Ambler	Normal
10	Angora	Normal
11	Ardmore	Normal
12	Ardsley	Normal
13	Bala	Normal
14	Berwyn	Normal
15	Bethayres	Normal
16	Bridesburg	Normal
17	Bristol	Normal
18	Bryn Mawr	Normal

This dialogue allows the user to set the Exterior Speaker level per time of day, trigger points and stations. Double click the setting value and select the desired speaker level. Available values are "Normal", "Soft" and "Mute".

*** Note: When the selected values from time, TP and station settings are different, the lower value takes the priority (i.e. Mute>Soft>Normal). Refer to Table 2.

Table 2 Example of Speaker Value Priority

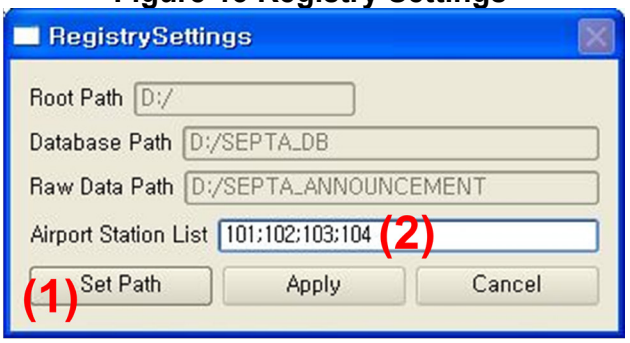
	TP1	TP2	TP3	TP4	TP5	TP6	TP7	TP8	TP9
07:00~08:00	Soft	Soft	Soft	Soft	Soft	Soft	Soft	Soft	Soft
TP Settings	Mute	Soft	Normal	Normal	Mute	Normal	Normal	Soft	Mute
Applied value	**Mute**	**Soft**	**Soft**	**Soft**	**Mute**	**Soft**	**Soft**	**Soft**	**Mute**

2.1.14. User Settings

Click

icon to open the User Settings Dialogue.

Figure 13 Registry Settings



1) Set Path: Select the drive or directory to store the database and the raw data. Changes are applied upon the next execution of the application.
2) Airport Station List: Add station codes to make exception from the Speaker settings.

*** Note: Database path and raw data path is automatically selected when the root path is selected.

2.2. Station Trigger and Announcement Information

Click "Station Trigger and Announcement Information" tab.

Figure 14 Station Trigger and Announcement Information

2) Station Information
3) Destination Information
4) Whole Train Route Announcements
5) GPS Trigger Point Information
6) Basic Announcements
7) General Announcements

2.2.1. Menu Icons

Table 3 Menu Icons (Station Trigger and Announcement Information)

Icon	Icon Name	Contents
	Import CSV	Import CSV
	Triggers	Trigger point information
	Whole Train	Whole train announcements
	LED	LED displays on Destination Indicators
	Basic Announcement	Automatic station stop announcements
	General Announcement	General announcements using extra trigger points
	Destination Edit	Route code and Primary Player header text
	Update	Create update data

2.2.2. Station Information

This section shows the list of stations registered in the database.

Figure 15 Station Information

Station Information

	Code	Station Type	Station Name	Destination Code	Terminus	CCPExpandName	Alternate
1	109	General Station	38th and Blake Station		No		No
2	113	General Station	40th and Airport - Gateway Park Station		No		No
3	110	General Station	40th and Colorado Station		No		No
4	102	General Station	41st / Fox Street Station		No		No
5	104	General Station	60th & Sheridan / Arvada Gold Strike Station		No		No
6	116	General Station	61st and Pena Station		No		No
7	106	General Station	Arvada Ridge Station		No		No
8	111	General Station	Central Park Station		No		No
9	103	General Station	Clear Creek / Federal Station		No		No
10	114	General Station	Denver Airport Station	UCA	Yes		No
11	105	General Station	Olde Town Arvada Station		No		No
12	108	General Station	Pecos Junction Station		No		No
13	112	General Station	Peoria Station		No		No
14	115	General Station	South Westminster Station	NWE	Yes		No
15	101	General Station	Union Station	UCA	Yes		No
16	107	General Station	Wheat Ridge / Ward Station	GLD	Yes		No

2.2.2.1. Modifying Existing Station Information

In the Station Information table, double click a data field to make change.

Type in text, or make selection from combo box as appropriate.

Figure 16 Modifying Station Information

Station Information

	Code	Station Type	Station Name	Destination Code	Terminus	CP
1	109	General Station	38th and Blake Station		No	
2	113	General Station	40th and Airport - Gateway Park Station		No	
3	110	General Station	40th and Colorado Station		No	
4	102	General Station	41st / Fox Street Station		No	
5	104	General Station	60th & Sheridan / Arvada Gold Strike Station		No	
6	116	General Station	61st and Pena Station		No	
7	106	General Station	Arvada Ridge Station		No	
8	111	General Station	Central Park Station		No	
9	103	General Station	Clear Creek / Federal Station		No	
10	114	General Station	Denver Airport Station	UCA	Yes	
11	105	General Station	Olde Town Arvada Station		No	
12	108	General Station	Pecos Junction Station		No	
13	112	General Station	Peoria Station		No	
14	115	General Station	South Westminster Station	NWE	Yes	
15	101	General Station	Union Station	UCA	Yes	
16	107	General Station	Wheat Ridge / Ward Station	GLD	Yes	

2.2.2.2. Adding New Station Information

To add a new station to the database, do one of the following:

- Select a location and press [Insert] (new field created at the selected location)
- Press [F9] (new field created at the bottom of the table)

Select/enter data into each data fields as appropriate.

2.2.2.3. Deleting Station Information

To delete a station from the database, click the station to delete and press [Delete].

Figure 17 Deleting Station Information

	Code	Station Type	Station Name	Destination Code	Terminus
1	109	General Station	38th and Blake Station		No
2	113	General Station	40th and Airport - Gateway Park Station		No
3	110	General Station	40th and Colorado Station		No
4	102	General Station	41st / Fox Street Station		No
5	104	General Station	60th & Sheridan / Arvada Gold Strike Station		No
6	116	General Station	61st and Pena Station		No
7	106	General Station			No
8	111	General Station			No
9	103	General Station	Clea		No
10	114	General Station			Yes
11	105	General Station	Olde Town Arvada Station		No
12	108	General Station	Pecos Junction Station		No

Click Yes to delete, No to cancel.

2.2.3. Trigger Information

This section shows the GPS trigger point coordinates used for the automatic announcement.

Figure 18 Trigger Information

Triggers Information

	TriggerPoint	Latitude	Longitude
1	3	39.876643	-75.243231
2	4	39.876643	-75.243231
3	5	39.876287	-75.244894
4	6	39.876152	-75.245592
5	7	39.876152	-75.245592

(1) (2) (3)

1) Trigger point index number
2) Longitude coordinate
3) Latitude coordinate

***Note: A trigger point can be configured with multiple GPS coordinates to provide better GPS coverage.

2.2.3.1. Modifying Existing Trigger Information

In the Trigger Information table, double click a data field to make change.

Type in text, or make selection from combo box as appropriate.

Figure 19 Trigger Point Dialogue

Triggers Information

	TriggerPoint	Latitude	Longitude
1	3	39.876643	-75.243231
2	4	39.876643	-75.243231
3	5	39.876287	-75.244894
4	6	39.876152	-75.245592
5	7	39.876152	-75.245592

2.2.3.2. Adding New Trigger Point Information

To add a new trigger point to a station, do one of the following:

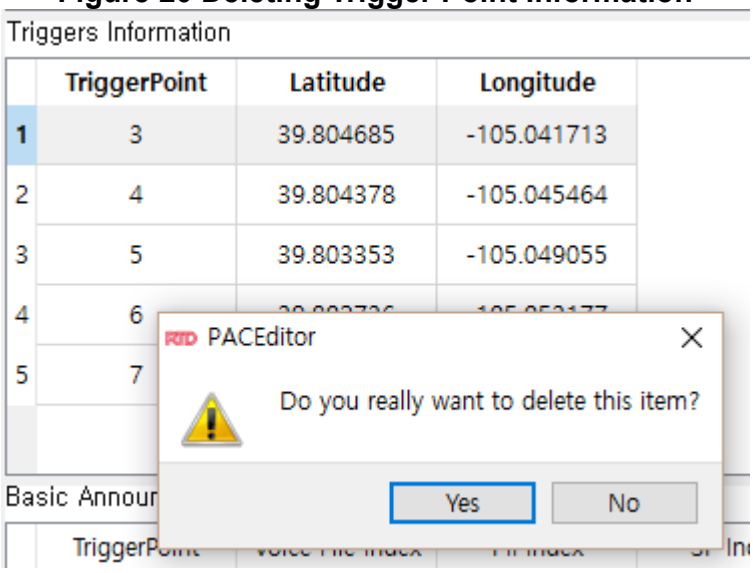
- Select a location and press [Insert] (new field created at the selected location)
- Press [F9] (new field created at the bottom of the table)

Select/enter data into each data fields as appropriate.

2.2.3.3. Deleting Trigger Point Information

To delete a trigger point from a station, select a trigger point and press [Delete].

Figure 20 Deleting Trigger Point Information



Click Yes to delete, No to cancel.

2.2.4. Editing Whole Train Announcements

This section shows the list of in-station announcements allocated for each train numbers. Double click a Train Number to make changes.

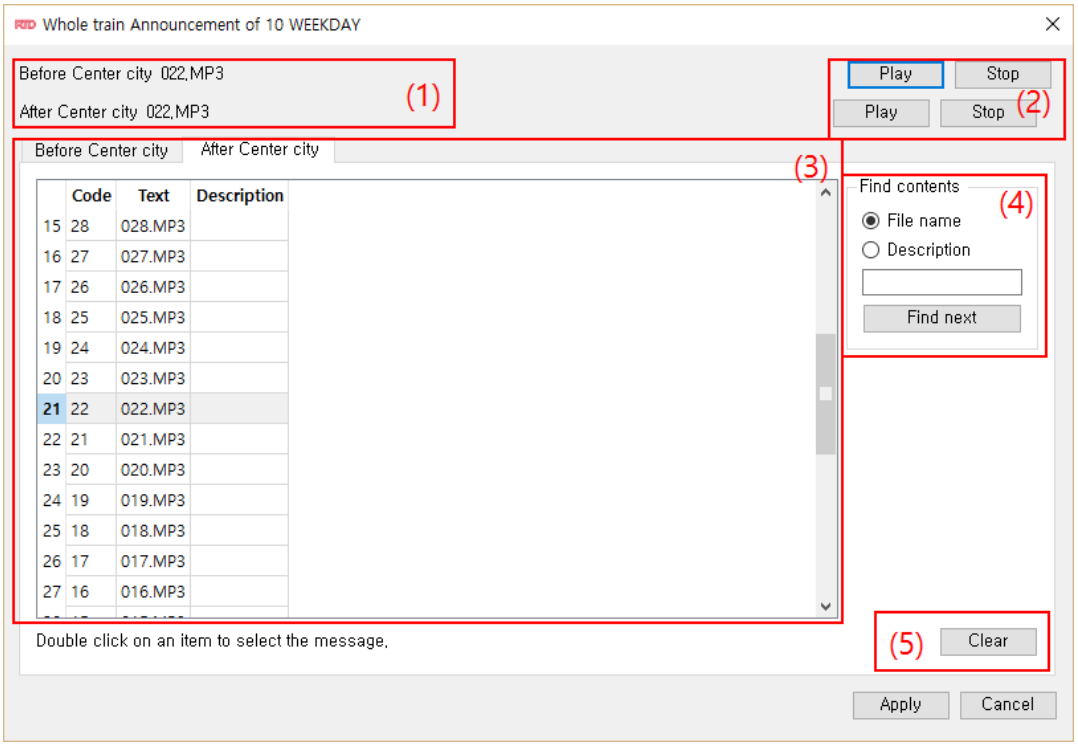
Figure 21 Whole Train Announcements Table

Whole Train

	Train Num	DaysOp	Before Center city	After Center city
1	10	WEEKDAY	022.MP3	022.MP3
2	11	WEEKDAY	001.MP3	001.MP3
3	50	WEEKDAY		
4	51	WEEKDAY		
5	80	WEEKDAY		
6	81	WEEKDAY		

Below dialogue will pop up:

Figure 22 Whole Train Announcements Dialogue



1) Shows currently selected audio file
2) Play/stop currently selected audio file
3) Shows list of selectable audio file. Double click an item to select
4) Search content by text
5) Remove currently selected audio file

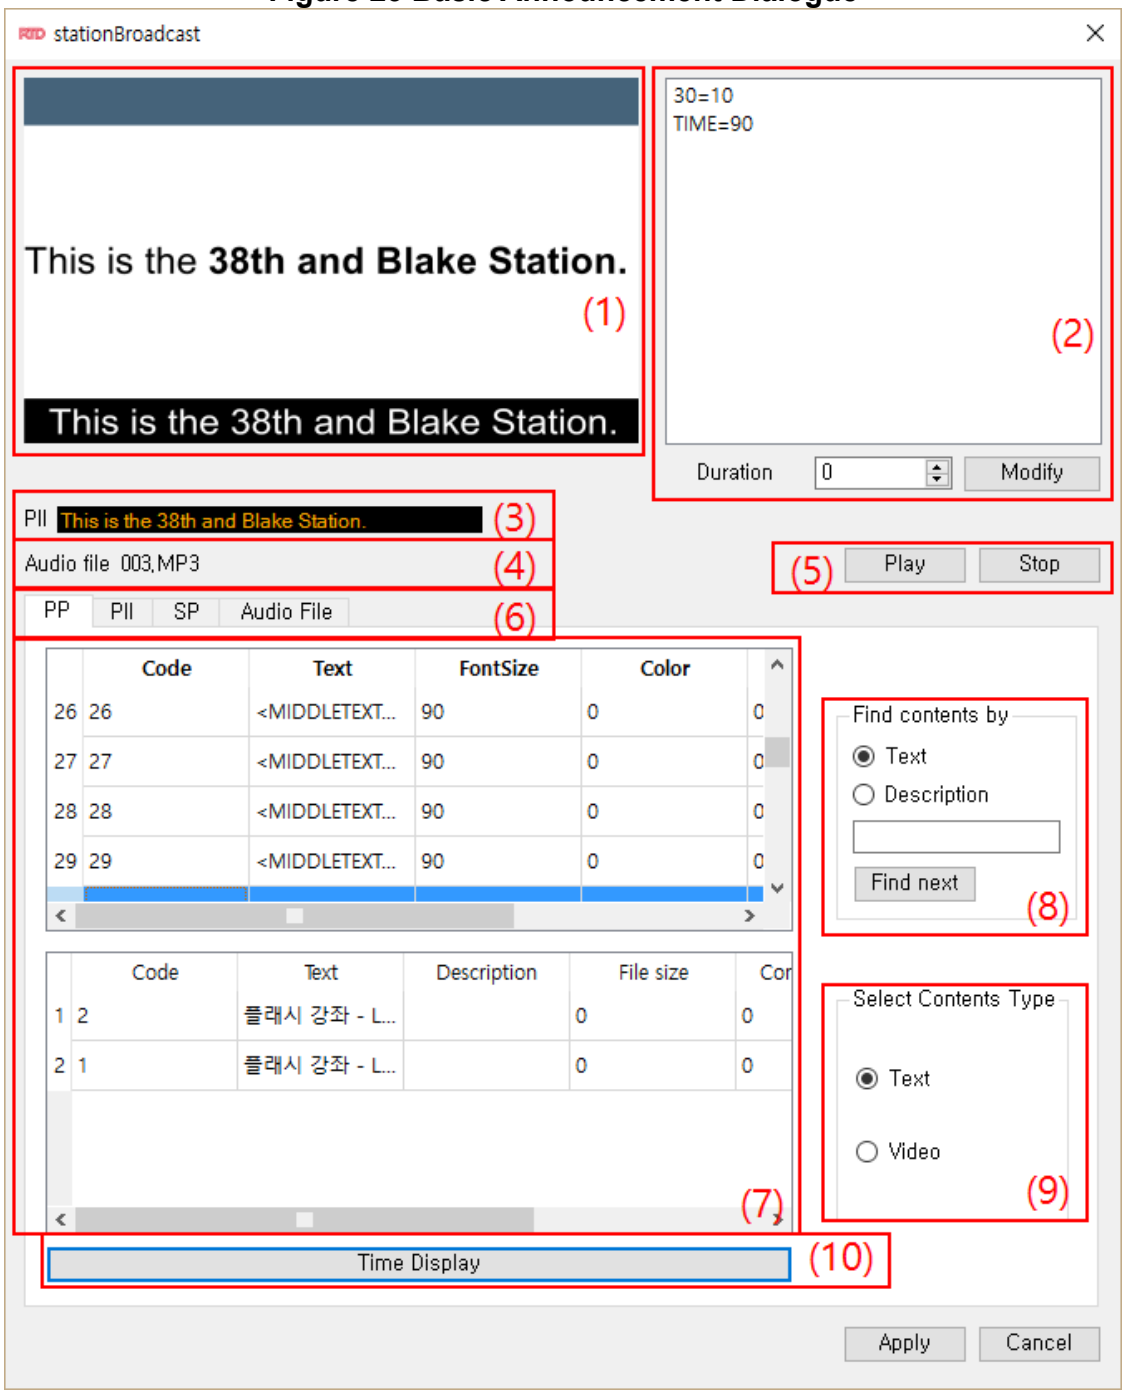
Click Apply to confirm, Cancel to dismiss.

*** Note: Audio files selected from this dialogue are automatically mapped to TP5 of each station.

2.2.5. Editing Basic Announcements

Trigger points 3, 4, 6 and 7 are used for regular station stop announcements and messages. Double click a trigger point to make changes on the contents.

Figure 23 Basic Announcement Dialogue



1) Preview of PP/SP messages
2) Message properties
    - [XX=YY], where:
        - [XX] indicates message index
        - [YY] indicates the length of message display (in seconds)
    - [TIME=ZZ], where:
        - [ZZ] indicates the length of clock display after the regular message (in seconds)
3) Preview of PII message
4) Currently selected audio file
5) Play/stop audio file
6) Select tab to display list of selectable content (PP/PII/SP/Audio)
7) Shows list of selcetable content. Double click an item to select
8) Search content by text
9) Select PP content type (text or video)
10) Add clock display to the message properties

Click "Apply" to store the data. Click "Cancel" to dismiss.

2.2.6. Editing General Announcements

Trigger points 1, 2, 8 and 9 are used for additional general announcements. Follow the same method as Section 2.2.5 to register informations for general announements.

*** Note: When you add contents to trigger points 1, 2, 8 or 9, ensure there are GPS coordinates defined for that trigger point. Refer to Section 0.

*** Trigger Point Reference**

5) PR message to be displayed on SDI
6) SP/PII/FDI/SDI tabs: Select to view the content list
7) Content list: Double click an item to select

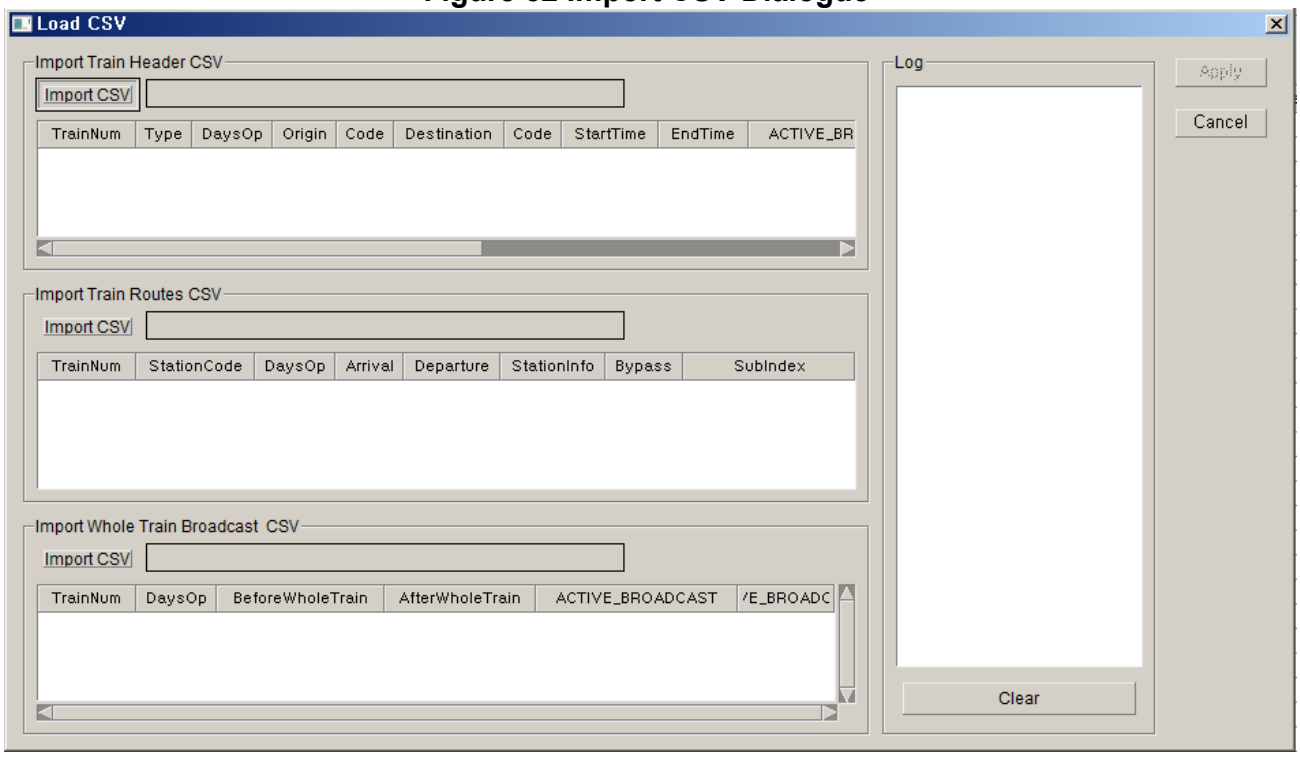
Click "Apply" to register the information. Click "Cancel" to dismiss.

2.5. Importing Train Schedules in CSV Format

Train schedules in csv format can be imported to the database. Click

icon to open the dialogue.

Figure 32 Import CSV Dialogue



Click "Import CSV" and select the csv file for the Train Header, Train Routes and Whole Train.

Figure 33 Importing Train Headers

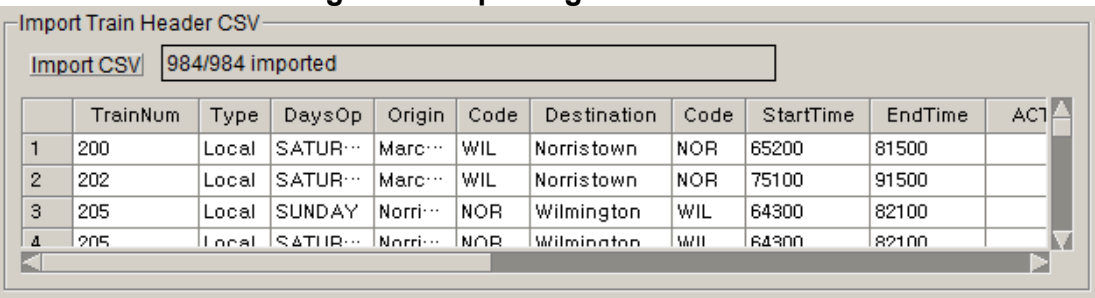


Figure 34 Importing Train Routes

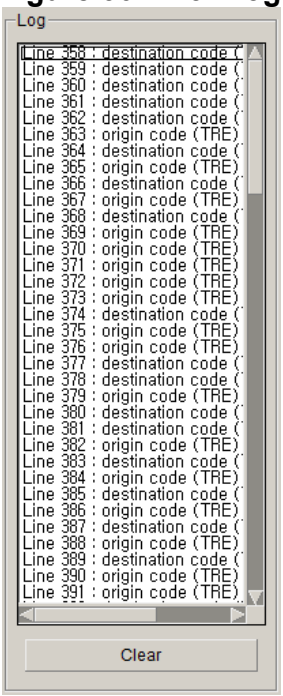
	TrainNum	StationCode	DaysOp	Arrival	Departure	StationInfo	Bypass	SubIndex
1	200	Wissahickon	SATUR···	74800	74800			22
2	200	Marcus Hook	SATUR···	65200	65200			1
3	200	Norristown	SATUR···	81500	81500			30
4	200	Main Street	SATUR···	81300	81300			29

Figure 35 Importing Whole Train Information

	TrainNum	DaysOp	BeforeWholeTrain	AfterWholeTrain	ACTIVE_BROADCAST	BROA
1	200	SATUR···	Wilmington_Route_···	Norristown_Rout···		
2	202	SATUR···	Wilmington_Route_···	Norristown_Rout···		
3	205	SUNDAY	Norristown_Route_···	Wilmington_Rout···		
4	205	SATUR···	Norristown_Route_···	Wilmington_Rout···		

If the contents of the csv file do not match the database, the information will be shown in the error log window. Click "Clear" to delete the logs.

Figure 36 Error Log



2.5.1. Acceptable File Format

The csv train schedule file shall be in below format. Any format other than specified in this manual is not supported.

Train Headers

Figure 37 CSV File Format – Train Headers

ActiveTrain	TrainNum	TrainVer	TrainType	DaysOp	Destination	DestinationLineCode	Origin	OriginLineCode	Path	EndTime	StartTime
