1. INTRODUCTION

This FMI provides instructions to install the updated PID video content to the vehicles.

The modification described in this FMI has been implemented to the fleet as of 6/30/2016. This document is submitted for future tracking purpose only.

2. SUMMARY

This FMI applies to following device:

- CRA-CNCS

3. INSTRUCTIONS

3.1 LOCATION OF EQUIPMENT

Following figures show the location of equipment to be updated.

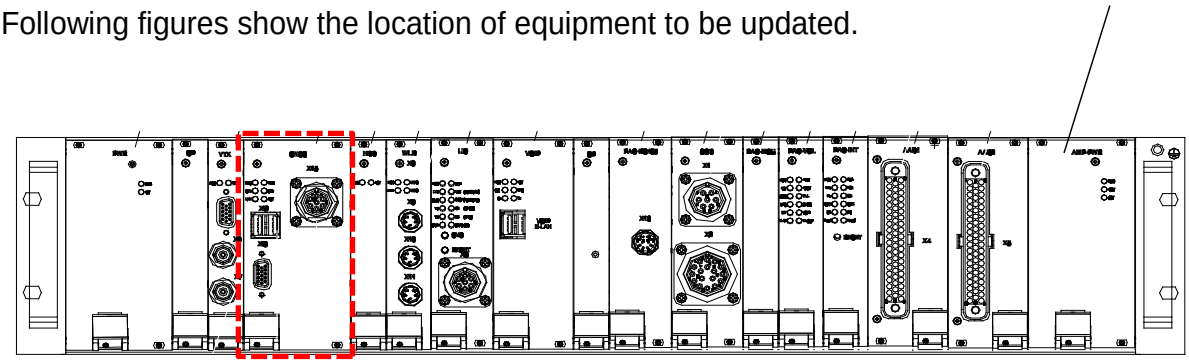

Figure 1 – CNCS Board Location

3.2 VIDEO FILE UPDATE

1) Plug in a USB flash drive and a wireless keyboard to the USB ports on the CNCS front panel.
2) Terminate all running applications
3) Copy the updated video file to CNCS directory: D:\Woojin\Contents
4) Recycle COMCB to apply the update.

3.3 TEST AND VERIFICATION

After updating the CRA-Main software, follow the procedure below to verify the functionality:

1) Key-on the cab
2) Using the CCP touchscreen, enter route number 10 or 11
3) Run the route simulation
4) Verify the simulated announcements and displays function appropriately.

4. RECOMMENDED VIDEO FORMAT

For future reference, recommended video format for PID content is as follows:

1) File format: *.avi file
2) Codec: XVID
3) Frame rate: 24 fps or less
4) Bit rate: 600kbps or less
5) Resolution: 1280 x 720
